

Communications Technician

Our Company

Mine Site Technologies (MST) is a global leader in providing solutions to improve safety, efficiency and productivity for mining and industrial markets. Australian owned and established for over 23 years, our solutions are trusted by the world's largest mining houses and operate in over 500 mines globally.

The Role

Reporting to the Manager - Operations West and based in our Kalgoorlie office, you will service our customers primarily in the Goldfields. This position is an important customer facing role involving the service and support of MST technologies and other 3rd party mining related technologies. As a Communications Technician, you will perform service and repair work both in the Kalgoorlie workshop and onsite. You will perform your duties and ensure that all work activities are executed according to the scope of work. At all times you will carry out your tasks in a manner required for successful project delivery ensuring that you meet MST quality and safety expectations.

Your Background

- Trade qualifications in communication/electronics
- At least 3 years' experience in either mining in a Communications role
- Australian Citizen or Permanent Resident
- Be able to pass a mine medical and regular drug and alcohol screens
- No criminal record
- Ability to work independently or as part of a team
- Unrestricted drivers licence
- Leaky Feeder Experience
- Knowledge of Ethernet and Wi-Fi
- Antenna Theory
- Coaxial, Cat5, Fibre Terminating and Repairs
- Use of Windows based and Windows Embedded PC's
- Analogue/Digital Video converters/servers
- Use of cable termination tooling
- Open Cable License
- Soldering Skills
