

## Optimising AXON Infrastructure Efficiency

- > Extends the **AXON Core** network connectivity by providing an additional GbE fibre I/O port.
- > 1 Gbps full duplex connection
- > Cost-effective solution for extending the network infrastructure and leveraging the **AXON Core**'s expansion capabilities

The **AXON Fibre4** is a plug-in extension module for the **AXON Core** providing an additional 1 Gbps fibre port. It enables further flexibility in network distribution underground. Using the same high-quality pre-terminated connectors as the **AXON Core**.

This module can be fitted to the left expansion slot of an **AXON Core**.

**AXON Core** with **AXON Fibre4** is a replacement option for the legacy **IMPACT NS50s** that have all fibre ports used.

## SPECIFICATIONS

### System Capabilities

- > AXON Core Extension module
- > 1 x 1Gbps full duplex optical fibre port

### Dimensions (mm) and Weight

- > 2006(h) x 119(w) x 96(d)
- > 400g

### Environmental parameters

- > IP65
- > Operating temperature: 0-50°C
- > Humidity: 95%

### Compliance

- > EMC: CE, FCC, RCM
- > Safety: IEC 62368-1
