

AXON dock

Enhancing safety
and productivity

- > Position edge computing where it is needed
- > Easy to deploy
- > PoE+ connectivity

Images are indicative

AXON dock

MST Global's AXON Dock extends the deployment options for AXON digital plug-in modules, allowing them to be positioned up to 100m from an AXON Core.

AXON Dock provides mounting and connectivity for a single **AXON Control** or **AXON Gateway** module. These modules can be placed in the best location for the task they need to do.

AXON Dock allows multiple AXON modules to be connected to a single **AXON Core**.

Shown with AXON module installed

SPECIFICATIONS

WIRED NETWORK CONNECTIVITY

- > 1Gbps, PoE+ port (RJ45)

POWER REQUIREMENTS

- > PoE+ Class 4 power requirement

COMPATIBILITY

- > AXON Control
- > AXON Gateway

CONFIGURATION

- > Switch defined power output for AXON Control

DIMENSIONS and WEIGHT

- > 185mm(h) x 120mm(w) x 57.5mm(d)
- > 0.5kg

Note that dimensions and weight exclude AXON module

ENVIRONMENTAL PARAMETERS

- > IP65 rated
- > Operating temperature: 0-50°C
- > Operating humidity: 5% to 90% (non- condensing)

COMPLIANCE

- > EMC: CE, FCC
- > Safety: IEC 62368-1
