

A Komatsu technology brand

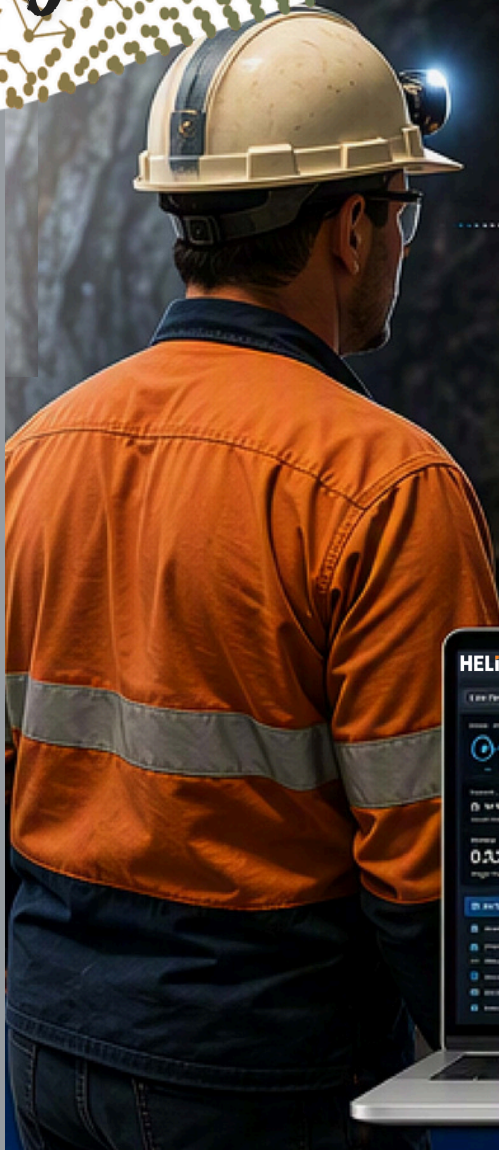

HELIX
Intelligent Control

Are you ready?

... for Australia's new
Workplace Exposure
Standards → LIMITS

- ✓ Silica (RCS) hazards present?
- ✓ DPM exposure risks underground?
- ✓ Relying on periodic monitoring?
- ✓ Limited exposure visibility?
- ✓ Manual compliance reporting?
- ✓ Difficulty proving compliance?

Real-Time Silica & DPM Exposure Management with HELIX

SILICA
MONITORING

DPM
MONITORING

WORKER
TRACKING

MONITOR Environmental & Exposure Intelligence

- Real-time silica (RCS) monitoring
- DPM monitoring underground
- Dust and airborne contaminant tracking
- Environmental condition monitoring
- Site-wide visibility and alerts

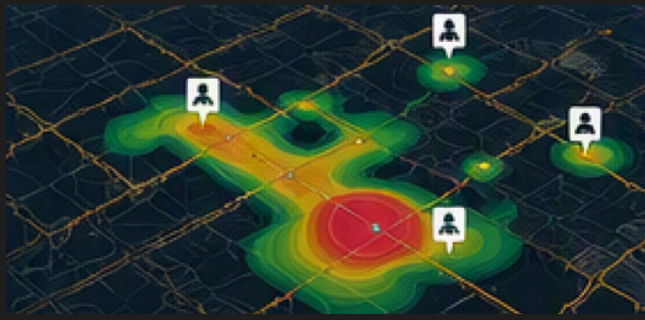

Know exposure as it happens not weeks later

TRACK Worker and Asset Awareness

- Real-time personnel tracking
- Exposure linked to worker and activity
- Movement through high-risk zones
- Exposure attribution by location
- Improved emergency response

Link exposure to people, places and activities

MANAGE Compliance & Operational Intelligence

- Automated dashboards and insights
- Exposure trend analysis
- Compliance reporting and audit trails
- Digital records and evidence
- Enterprise-wide visibility

Turn data into action and demonstrate compliance

CONNECTED INTELLIGENCE HELIX brings environmental monitoring, personnel tracking and operational data together in one platform

Delivering:

- ✓ Real-time visibility
- ✓ Better decisions
- ✓ Proactive risk management
- ✓ Safer, more productive workplaces

WHAT GOOD LOOKS LIKE

- Real-time silica and DPM visibility
- Worker exposure traceability
- Automated alerts and notifications
- Digital compliance and audit ready
- Connected Monitoring across sites
- Proactive exposure management
- Better decisions, safer workplaces

Australia's workplace exposure requirements are evolving. HELIX combines real-time monitoring, worker tracking and operational intelligence to help you protect your people and meet compliance
